

# Research Study: Exploring Accessible Beauty - Evaluating Perfume Bottle Designs for Individuals with Upper Extremity Deficits

## What is the purpose of this study?

The purpose of this study is to investigate the accessibility of perfume bottle designs for individuals with upper-extremity disabilities. The study seeks to provide insights and recommendations for improving the accessibility of beauty products, ultimately promoting inclusivity.

## What is involved with participation?

Those who qualify will be provided with a selection of perfume bottles that were chosen for their potential accessibility features. Participants will trial perfume bottles to assess for ease of use and to provide feedback based on their experience.

The study consists of meeting one time for 45 minutes. The following data will be collected throughout the study:

- Assessments will be made by trained therapists to test your ability to perform fine motor and grasping exercises.
- In-person visit will provide training on perfume bottles and completion of surveys.

## Who is eligible to participate?

- Individuals between the ages of 18 and 55
- Minimal to moderate upper-extremity deficits

For more information or to find out if you or your patient or family member qualifies, please contact Niko Fullmer, Research Project Supervisor, Casa Colina Research Institute, at 909/596-7733, ext. 2220 or [nfullmer@casacolina.org](mailto:nfullmer@casacolina.org).
